INDEX TO VOL. XXIV.

ABSORPTION of fat, 294, 493.
Acapnia and shock, 66.

BENEDICT, F. G. An apparatus for studying the respiratory exchange, 345.
BENEDICT, F. G. See CARPENTER and BENEDICT, 187, 203.
Blood, coagulation of, 406.
Blood pressure, affected by smoking, 104.
Bone ash, effect on metabolism and digestion, 297.
BRUCE, J. W., J. R. MILLER, and D. R. HOOKER. The effect of smoking upon the blood pressures and upon the volume of the hand, 104.

CARPENTER, T. M., and F. G. BENEDICT. Mercurial poisoning of men in a respiration chamber, 187.
CARPENTER, T. M., and F. G. BENEDICT. Preliminary observations on metabolism during fever, 203.
Centre of gravity, determination in men, 286.
Coagulation, in muscle, 1.
——, of blood, 406.
——, related to heat-shortening, 178.
Contractility, related to ions, 459.
Contractions, rhythmical, in Gonionemus, 117.
COOK, F. C. The effects of chloride, sulphate, nitrate, and nitrite radicles of some common bases on the frog's heart, 263.
Coronary vessels, innervation of, 391.
Creatinin output in man, 45.

DESICCATION, an improved method, 297.
Digestion, rate in cold-blooded vertebrates, 447.

ENZYMES, relation of secretion to blood supply, 234.
ERLANGER, J. Can functional union be re-established between the mammalian auricles and ventricles after the destruction of a segment of the auriculo-ventricular bundle? 375.
EVERINGHAM, S. See LEE and EVERINGHAM, 384.

FARADIC stimulation, the measurement of "make" shocks, 269.
Fat absorption, 294, 493.
Fatigue, of spinal cord, 384.
Fever, metabolism in, 203.

HART, E. B., E. V. MCCOLLUM, and G. C. HUMPHREY. The rôle of the ash constituents of wheat bran in the metabolism of herbivora, 86.
Heart, auriculo-ventricular bundle, 375.
——, innervation of coronary vessels, 391.
——, relation of inorganic salts to contractility, 263.
——, relation of vagus action to temperature, 341.
HENDERSON, Y. Acapnia and shock.—III. Shock after laparotomy; its prevention, production, and relief, 66.
HOOKER, D. R. See BRUCE, MILLER, and HOOKER, 104.
HUMPHREY, G. C. See HART, MCCOLLUM, and HUMPHREY, 86.
Hydrolysis, of crystallized albumin from hen's egg, 252.
——, of muscle of scallop, 161.
——, of ox muscle, 437.
——, of vitellin, 153.

INDUCTORIUM, measurement of "make" shocks, 269.

JONES, D. B. See OSBORNE, JONES, and LEAVENWORTH, 252.
JONES, D. B. See OSBORNE and JONES, 153, 161, 437.

KRISTELLER, L. See LEVENE and KRISTELLER, 45.

LEAVENWORTH, C. S. See OSBORNE, JONES, and LEAVENWORTH, 252.
LEE, F. S., and S. EVERINGHAM. Pseudo-fatigue of the spinal cord, 384.
LEVENE, P. A., and L. KRISTELLER. Factors regulating the creatinine output in man, 45.
LILLIE, R. S. On the connection between changes of permeability and stimulation, and on the significance of changes in permeability to carbon dioxide, 14.
LILLIE, R. S. The relation of ions to contractile processes. — IV. The influence of various electrolytes in restoring muscular contractility after its loss in solutions of sugar and of magnesium chloride, 459.
LOTHROP, A. P. The effects of bone ash in the diet on the gastro-intestinal conditions of dogs, 297.
LOVETT, R. W. See REYNOLDS and LOVETT, 286.
LYON, E. P. On rheotropism. — II. Rheotropism of fish blind in one eye, 244.

MCCOLLUM, E. V. See HART, MCCOLLUM, and HUMPHREY, 86.
MARTIN, E. G. A quantitative study of faradic stimulation. — III. The measurement of "make" shocks, 269.
MEIGS, E. B. Concerning the supposed connection between protein coagulation and the heat shortening of animal tissues, 177.
MEIGS, E. B. Heat coagulation in smooth muscle; a comparison of the effects of heat on smooth and striated muscle, 1.
MENDEL, L. B. The absorption of fats stained with Sudan III, 493.
MENDEL, L. B., and H. G. WELLS. Experimental studies on the physiology of the molluscs, — fourth paper, 170.
Mercurial poisoning of men in a respiration chamber, 187.
Metabolism, in fever, 203.
——, rôle of wheat bran, 86.
MILLER, J. R. See BRUCE, MILLER, and HOOKER, 104.
Molluscs, chemical physiology of, 170.
Muscle, coagulation in, 1.
——, contractility restored by various electrolytes, 451.
——, heat shortening, 178.

OSBORNE, T. B., and D. B. JONES. Hydrolysis in ox muscle, 437.
OSBORNE, T. B., and D. B. JONES. Hydrolysis of the muscle of scallop (Pectens irradians), 161.
OSBORNE, T. B., and D. B. JONES. Hydrolysis of vitellin from the hen's egg, 153.
OSBORNE, T. B., D. B. JONES, and C. S. LEAVENWORTH. Hydrolysis of crystallized albumin from hen's egg, 252.

PERMEABILITY, relation to CO_2, 14.
PIKE, F. H. Studies in the physiology of the central nervous system. — The general phenomena of spinal shock, 124.

RESPIRATION chamber, poisoning in, 187.
Respiratory exchange, method for study of, 345.
RETTGER, L. J. The coagulation of blood, 406.
REYNOLDS, E., and R. W. LOVETT. A method of determining the position of the centre of gravity in its relation to certain bony landmarks in the erect position, 286.
Rheotropism of fish blind in one eye, 244.
Rhythmical contractions in Gonionemus, 117.
RIDDLE, O. The rate of digestion in cold-blooded vertebrates. — The influence of season and temperature, 447.
Rigor caloris, 178.
RYAN, J. G. The variations in the enzyme concentration with the variation in the blood supply to the secreting gland, 234.

SECRETION, enzyme concentration related to blood supply, 234.
SHACKELL, L. F. An improved method of desiccation, with some applications to biological problems, 325.
Shock, 124.
—— and acapnia, 66.

Smoking, effect on blood pressure, 104.
Spinal cord, pseudo-fatigue of, 384.
STEWART, G. N. The influence of the temperature of the heart on the activity of the vagus in the tortoise, 341.
Stimulation, relation to permeability, 14.

TERRY, O. P. The production by hydrogen peroxide of rhythmical contractions in the marginless bell of Gonionemus, 117.

VAGUS, effect of temperature upon, 341.

WELLS, H. G. See MENDELL and WELLS, 170.
Wheat bran, rôle of ash constituents in metabolism, 86.
WHITEHEAD, R. H. A note on the absorption of fat, 294.
WIGGERS, C. J. The innervation of the coronary vessels, 391

UNIV. OF MICH.
AUG 4 1909

THE AMERICAN

JOURNAL OF PHYSIOLOGY

EDITED FOR

The American Physiological Society

BY

H. P. BOWDITCH, M.D., Boston
R. H. CHITTENDEN, Ph.D., New Haven
W. H. HOWELL, M.D., Baltimore
FREDERIC S. LEE, Ph.D., New York
W. P. LOMBARD, M.D., Ann Arbor
G. N. STEWART, M.D., Chicago
W. T. PORTER, M.D., Boston

Vol. XXIV.—No. V.

Issued August 2, 1909

BOSTON, U.S.A.

1909

CONTENTS

HYDROLYSIS OF OX MUSCLE. *By Thomas B. Osborne and D. Breese Jones* 437

THE RATE OF DIGESTION IN COLD-BLOODED VERTEBRATES. — THE INFLUENCE OF SEASON AND TEMPERATURE. *By Oscar Riddle* . . 447

THE RELATION OF IONS TO CONTRACTILE PROCESSES. — IV. THE INFLUENCE OF VARIOUS ELECTROLYTES IN RESTORING MUSCULAR CONTRACTILITY AFTER ITS LOSS IN SOLUTIONS OF SUGAR AND OF MAGNESIUM CHLORIDE. *By Ralph S. Lillie* 459

THE ABSORPTION OF FATS STAINED WITH SUDAN III. *By Lafayette B. Mendel* 493

THE AMERICAN JOURNAL OF PHYSIOLOGY is issued monthly. Each volume will contain about five hundred pages. The price of one volume sent postage free to subscribers in the United States and Canada is five dollars; to subscribers in other countries, five dollars and twenty-five cents. The price of Volumes One, Two, and Three will be six dollars to domestic subscribers, and six dollars and twenty-five cents to foreign subscribers. All subscriptions are payable in advance.

Subscriptions, manuscript, and all other communications should be sent to THE AMERICAN JOURNAL OF PHYSIOLOGY, Box 127, Back Bay Post Office, Boston, Mass., U.S.A.

Contributors will receive fifty copies of their papers free; additional copies may be obtained at cost.
